

Business as unusual: Purposeful engagement

A free webinar for human services organisations
navigating complexity and uncertainty

More than ever, government and non-government organisations are expected to engage with their stakeholders to understand challenges and shape solutions.

In the last few months, we have had to shift our engagement online and the need to do so may continue beyond social distancing restrictions.

**How do you develop purposeful engagement strategies?
When should you use digital, online or virtual
engagement methods?
What works to achieve broad and deep engagement?**

Join us for an interactive conversation with Amelia Loye, Founder and Managing Director of engage2.

Tap into the expertise she has gained over 17 years of helping governments and organisations in Australia, New Zealand and Canada understand communities and engage stakeholders in the design and delivery of policy, digital transformations, programs and services.

Join us on **Wednesday 24 June 2020 at 9:00am AEST.**
